Logotype

Variations

Logo can be used on a blue or a white background, in the horizontal format where appropriate. Always use the master logo files provided and do not adjust or scale the elements.

Icon

Colour

All colour references provided in CMYK for print and RGB for screens. Please use the relevant colour breakdown depending on the application.

Size and space

Use best judgement when sizing the logotype. 'Investing' should never be less than 0.8mm high at print size. Always use print proofs to determine legibility.

Let the logo breathe, keep a clear space equal to the size of the heart, surrounding the logo on all sides as above.
