2026

Best Impact-Focused Fund Management Firm

Best Investment Company

Best ESG fund: Climate focused

Best ESG Fund

We are **raising $75 million** for its Blue Frontier Fund I, **a Japan-EU impact venture capital fund investing** in new blue economy across Europe and Japan.

Investing in **disruptive, marine-bio, blue foods, ocean clean technology**, and **blue carbon climate solutions** —backing B2B companies that restore marine ecosystems while building resilient supply chains.

The focus of the fund is **ocean resilience**, with a unique alignment of **Japanese operational expertise**, **European capital markets**, and **strategic autonomy drivers** in both regions—where innovators, corporations, and policymakers are converging on the shared reality that there is no blue economy without supply chain security.

We back the **disruptive deep-tech ventures** in the blue economy — **investing with conviction** and **hands-on operational expertise** to generate **outsized returns** while **helping oceans breathe again**.

Experience

- 7+ years investing in early-stage bioeconomy solutions
- 6 investments in blue-economy companies
- Deep operational expertise running and building blue food companies
- Network of research institutes, experts, and co-investors in Japan and EU

Hands-on

- Operational scaling – go-to-market, supply chain, and regulatory navigation
- Strategic Partner – open doors to corporates, research institutes, and policy makers
- Deep-tech commercialisation – bridging R&D to product-market fit
- Lead Investor – set terms, syndicate, and drive governance

INTRODUCTION TO BEYOND IMPACT

PIONEER IMPACT VC

- Founded by Claire Smith in 2017, Beyond Impact has been a pioneer in providing venture capital for the transition towards a kinder, cleaner, healthier world
- Core thesis of resilience resulting from the replacement of animal-derived products across supply chains in nutrition, ingredients, pharmaceuticals and materials,
- Impact goals central to investment thesis and include human health, planetary health and eliminating animal suffering. Fund classified as Article 9 (SFDR)

STRONG TRACK RECORD

- Fund I established in 2018, invested in 23 ventures, 2.3x TVPI (*Jan '24*)
- Fund II launched in 2022, global mandate, raised $25m with 10 active investments todate, in final year of investment period
- Early investor in industry defining companies. Portfolio companies have raised >$1bn post initial Beyond Impact investment
- Total AUM $175M across two Luxembourg impact VC funds, UK nominee structure for co-investments and Sponsor and Adviser to the US Vegan Climate ETF (CBOE listed, ticker: VEGN)

CREDENTIALS

- Female-led and diverse team of expert venture capitalists & impact investors with deep knowledge of the sector. Thought-leader on topics such as sustainable and ethical investing.
- One of the most extensive networks in animal-free ventures in nutrition, ingredients, pharmaceuticals and materials industry. Team with 80+ years of direct experience and a network of venture partners, advisors and strategic partners with presence in Europe, North America, Asia and MENA

INTRODUCTION TO UMITO PARTNERS

Certified B Corporation

LEADING VOICE IN 'NEW BLUE ECONOMY'

UMITO Partners is a Tokyo based ocean sustainability pioneer, dedicated to creating systemic change by harnessing innovative solutions for ocean conservation, sustainable fisheries, and the regeneration of marine biodiversity.

UMITO Partners is working to rebuild the relationship between people and the ocean — grounded in sustainability, equity, and regeneration.

STRONG TRACK RECORD

- With over a decade of hands-on experience, UMITO Partners has successfully raised and deployed more than $10 million in funding dedicated exclusively to ocean sustainability initiatives across Japan.
- The firm has launched over ten sustainable fisheries projects, achieved five prestigious MSC and ASC certifications, and served as Japan's first accredited Ocean Impact Navigator auditor for four early-stage ocean-focused startups.
- Between 2023 and 2025, UMITO hosted a series of ocean resiliency events drawing more than 1,000 total attendees, bringing together politicians, seafood leaders, and corporate leaders around the world.

CREDENTIALS

- UMITO Partners, Japan's first B Corp-certified ocean sustainability consulting firm, was named “Regenerative Company 2025” by WIRED Japan.
- Trusted as a government advisor on the National Aquaculture Strategy Committee, UMITO is the only company in Japan offering MSC/ASC consultation services and pioneered using the Ocean Impact Navigator to assess ocean-related startups, and impact investment connecting Japan - APAC and Europe.

STRUCTURAL INFLECTION POINT

The blue economy is complex and vast but capital must be selective

The Opportunity

- Our **ocean generates up to 7% of global GDP** yet is underinvested by venture capital, and there is potential to unlock high return on innovation investment.
- Regulation and consumer demand are **pushing for a regenerative ocean economy**, and structures such as blue carbon and biodiversity credits are creating a new market for natural carbon cycle solutions from the ocean

Our Advantage

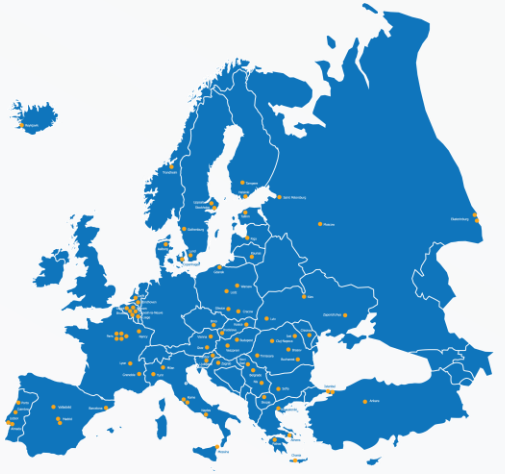

- **Bridging the knowledge-gap:** By fusing Beyond Impact's expertise in climate investments with UMITO Partners' deep understanding of blue economy.
- **Specialist Premium**: There are very few specialized thematic funds capable of underwriting these complex technologies at a stage when companies are ready to commercialise and scale.
- **Leading & Pricing:** We lead rounds, dictate terms, and secure board seats to drive strategy.

"According to Builders Vision 2025 report, less than 1% of sustainable investment dollars currently flow to the blue economy, despite the global blue economy being valued at over USD 24 trillion. The sector today stands where solar and electric vehicles were two decades ago—poised for scale, but in need of patient and strategic capital to bridge the gap."

JAPAN–EUROPE AS THE NEW ENGINE

Supply chain scarcity + bilateral urgency + deployable science
= our investment window

- Horizon Europe – Japan Association: Japan officially joined Horizon Europe's Pillar II (€52B+) in July 2026, becoming the most populous associated country . This means Japanese research institutes, universities and enterprises can now participate in EU-led consortia on equal terms — reducing administrative barriers and unlocking joint funding for ocean-related challenges including climate, energy, bioeconomy, and maritime transport.
- BlueBio Alliance – Portugal to Japan: At Expo 2025 Osaka, the BlueBio Alliance presented Portuguese success stories in marine biotechnology, algae-based materials, and ocean-derived therapeutics as models for Japan–Europe collaboration
- EU–Japan Green Alliance: Both sides are now pushing to include decarbonisation of the maritime industry and just transition in the operational work plan

The blue economy is no longer just an environmental imperative — it's a supply chain security issue. With Japan and Europe both racing to reduce critical dependencies, we see a once-in-a-decade opportunity to back deep-tech ventures that turn ocean resources into scalable, superior, and sustainable commercial solutions.

PROPRIETARY DEALFLOW

Co-Investors & Corporate Partners

nutreco · Grupo Bimbo (Nourishing a better world) · Thai Union · NEOM Investment Fund · Lewis & Clark Agrifood · Cargill · Döhler · DSM · Pulmuone · LDC (Louis Dreyfus Company) · Ajinomoto · SOSV · Ingredion · Samsung Welstory · M. Ventures · Griffith Foods

Sourcing

- Affiliated company, Beyond Animal: a leading networking platform for sustainable impact ventures globally
- Supports ecosystem with connections, events, recruitment, industry expertise
- Provides extensive deal-flow and market insights

Downstream Fundraising Support

- Supports portfolio companies' future capital raising via proprietary platform (called Funding by Beyond Animal), an invite-only online deal room backed by a 10,000+ database of investors
- Facilitates investor interactions, data room creation and transaction management

Co-investment Opportunities

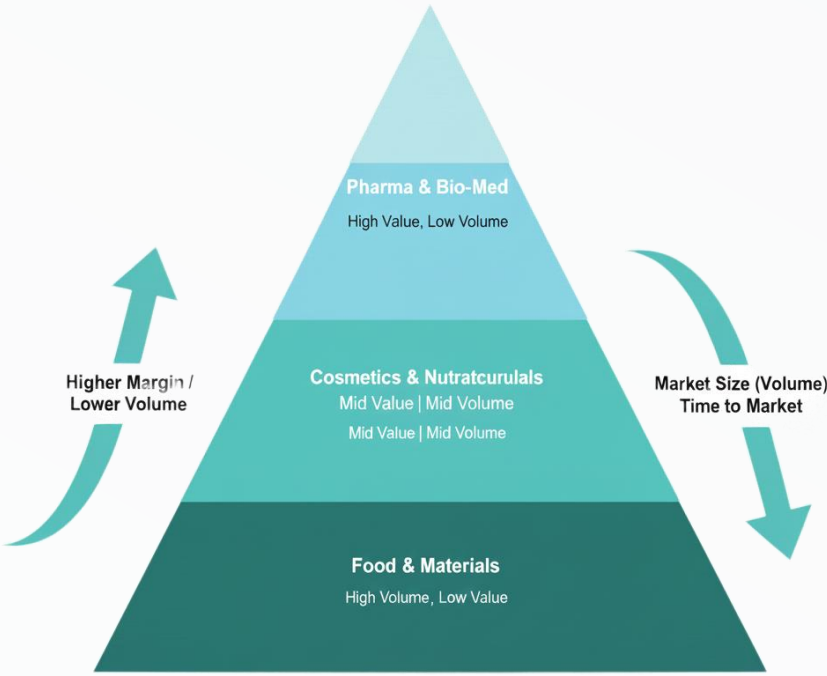

- Opportunity to upsize high conviction bets and participate in follow-ons, secondaries, use of pro ratas
- Diligence support via access to Beyond Impact investment memo

HIGH-MARGIN BEACHHEAD MARKETS

Bypassing the "Commodity Trap" by targeting high-value, low-volume applications first.

The Volume Paradox:

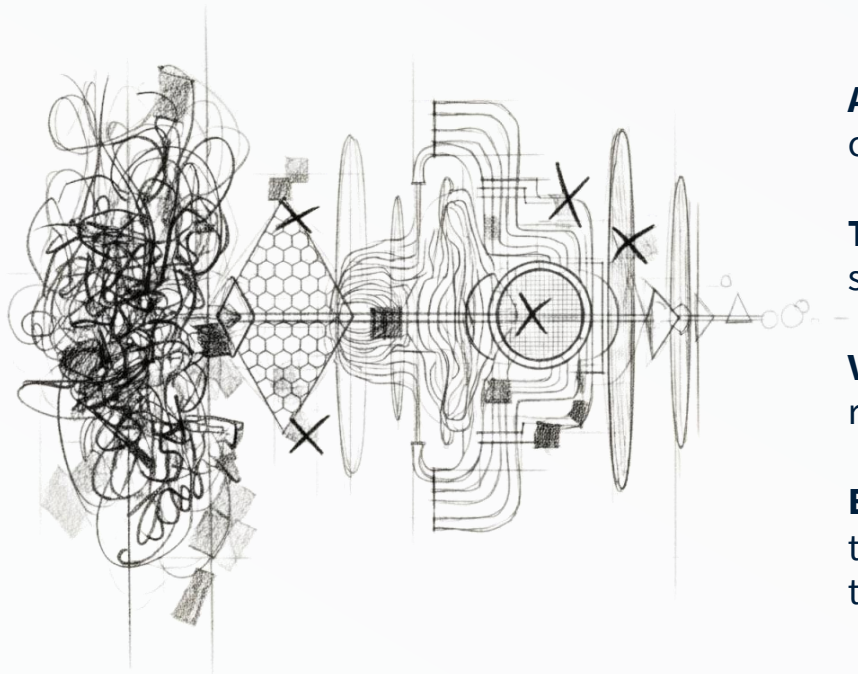

- The largest TAM is in commodity food (meat/dairy replacement), but this requires massive scale and faces the toughest price parity challenges.
- Scaling SynBio and cultivation hardware to serve mass-market food volumes immediately is capital inefficient in the current high-rate environment and risky given consumer demand has yet to be developed.

Value Over Volume:

- Smart companies are pivoting to Personal Care, Pharma, and Functional Ingredients where unit economics work today at low production volumes.
- Pharma & Biomedical: Using cell-cultivation for high-value medical applications (e.g., organ-on-chip for drug testing) or producing rare therapeutic molecules.
- Cosmetics & Specialty: Precision fermentation for high-value bioactive ingredients (e.g., collagen, peptides, fragrances) where consumers pay a premium for "cruelty-free" and "sustainable" claims.

“SPECIALIST” FILTER

Disciplined selection over market hype: How our rigorous B2B filters protected us from high-profile capital traps.

Beyond Impact “Specialist” Filter

Avoid the "Commodity Ingredients" Race: We pass on ventures solely replacing low-cost ingredients where margins are thin and price parity is the only lever.

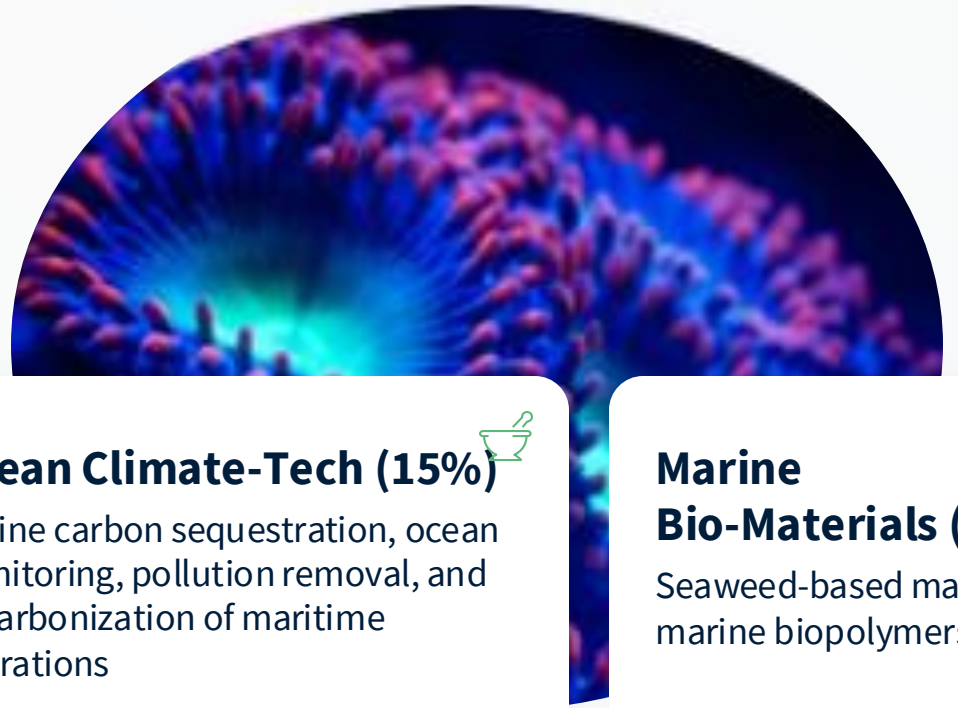

Team & Governance Integrity: We prioritize teams with deep execution experience and stable leadership.

Valuation Discipline: We refuse to participate in "hype-driven" rounds that do not reflect the technical and commercial reality of bio-manufacturing.

Beachhead Focus: Unlike companies that burn out chasing the mass market, we back those starting with high-margin, specialized niches to fund their initial growth and go-to-market with stringent resource efficiency.

BLUE FRONTIER THESIS

Investing in marine solutions that are superior, scalable and sustainable

Blue Bio & Foods (60%)

Sustainable marine proteins, microalgae, fermentation-based seafood alternatives, and upcycled ocean ingredients

Ocean Climate-Tech (15%)

Marine carbon sequestration, ocean monitoring, pollution removal, and decarbonization of maritime operations

Marine Bio-Materials (25%)

Seaweed-based materials, marine biopolymers, etc

From **Europe & Japan** to the **Global Market**

- $3 trillion blue economy projected by OECD by 2030 90% of marine fish stocks overfished or fully exploited
- Fishmeal prices up 3.5x, fish oil up 9.5x (2000–2020)
- $25B+ marine bio-ingredient market projected by 2034

- Ocean absorbs 25% of annual CO2 emissions
- Blue carbon ecosystems sequester up to 4x more carbon than terrestrial forests
- $29.33B global ocean-based climate solutions market by 2030 (16.66% CAGR), spanning blue carbon restoration, offshore renewables, seaweed cultivation, and engineered carbon removal

- $5.2B marine biopolymer market by 2030, with applications across water treatment, food & beverage, cosmetics, and pharmaceuticals
- Marine biopolymers offer unique properties: high water retention, biocompatibility, hydrogel formation, etc

ADDRESSING SUPPLY CHAIN VULNERABILITIES

Evidence that disruption is happening

Metric (Global)	Latest	Pre-disruption	Change
Overfished stocks	35.5%	~10% (1974)	+255%
Fishmeal price (since 2000)	4x	1x baseline	+300%
Fish oil price (since 2000)	9.5x	1x baseline	+850%

Why the chain is structurally vulnerable

Overfishing at scale: Since 1974, overfished global fish stocks have risen from ~10% to 35.5%—a 255% increase. The Mediterranean and Black Sea now report 65% of stocks overfished, with annual catch losses of 15 million tonnes worth US$39 billion.
Resource Choke Points: A single kilogram of farmed salmon requires 3–5 kg of wild fish for feed. Fishmeal prices have quadrupled since 2000; fish oil prices are up 9.5x.

Consumer & production inflection

- Peak wild catch already passed globally; aquaculture now dominates seafood supply.
- Marine ingredients in aquafeed have dropped from 25% to 3% (2000–2023)—structural scarcity.
- Japan cut China mineral reliance from 90% to 60–70%; ocean feed ingredients are the next frontier.

The marine fish supply chain is not "at risk"; it is actively breaking.

Sources: USDA AMS (2025), APHIS HPAI Dashboard.

INVESTMENT STRATEGY

PRICING

- Targeting **30–50% discount** to 2021–2022 valuation peaks.
- Prioritizing ventures with **proven commercial traction, regulatory pathways, production and technical readiness**.
- **Actively Pricing the rounds** by being a co-lead/lead investor.

SCOPE

- Companies with significant **R&D advancement and sales traction.**
- Pre-Series A (Late Seed) to Series B (sweet spot **Series A**)
- Stringent selection criteria including **full alignment** with **values** and **thesis**, **real innovation**, **capex-light**, solving issues in **existing supply chains** and **strong founder/management** teams.

APPROACH

- Highly **curated screening leveraging Japan-EU network of research institutes**, corporate partners, and seafood cooperatives.
- Close involvement and long-term support of portfolio companies including significant **follow-on investments** and **Board representation.**

IMPACT PILLARS

Marine Biodiversity & Restoration

- Enable habitat rewilding and ocean ecosystem recovery
- Net-positive ecosystem gains through standardized marine biodiversity restoration metrics.
- Track marine animal lives spared by replacing wild-caught sea creatures with ethical, animal-free alternatives

Blue Climate Action

- Target aggressive methane mitigation for immediate planetary cooling effects.
- Prioritize innovations like seaweed and microalgae that deliver active carbon removal.
- Benchmark all portfolio companies against global net-zero and Paris-aligned pathways.

Clean & Safe Marine Nutrition

- Eliminate toxin exposure by producing nutrients free from microplastics, mercury, and heavy metals.
- Combat chronic disease with pure, bio-available ingredients that replace contaminated animal sources.
- Ensure consumer safety by decoupling nutrition from polluted ocean supply chains through controlled production.

PORTFOLIO CONSTRUCTION

Investments

- Average initial ticket **$0.5–1.5 million**
- Follow-ons in 50% of cases, average ticket size of **$1 million**. Intent with follow-ons to maintain ownership in top performing positions.

Portfolio

- ~22 companies
- Focus: Late Seed-Series A
- Target country: Japan (30%)and Europe (70%)
- Thesis: Blue Bio & Foods – 60%; Bio-Materials - 25% and Climate Tech – 15%

Performance

- Average hold period 6-7 years
- Target ownership: 10%-30% - ownership stake at entry (negotiated based on pre-money valuations and strategic alignment).
- Target IRR >30%[1]

Fund Metrics

- USD 75m fund size
- 10-year fund life
- Strategic LP's in core focus countries
- SFDR Article 9 "Dark Green" fund, Luxembourg SICAV-RAIF

1 Net of all fees.

Open to explore with strategic LP's ways to build on local ecosystems and talent

INVESTMENT TEAM

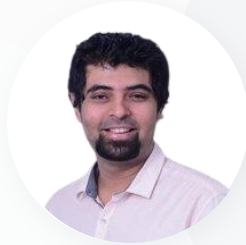

CLAIRE SMITH | BEYOND IMPACT

Founder of Beyond Investing and Beyond Animal platform. 35+ years of financial management experience. Head of Equity Quantitative Strategies at Albourne Partners Limited, Head of Investor Derivative Marketing at UBS, and Head of Convertible Sales at Swiss Bank Corporation. Among the earliest investors in Geltor, EVERY, Mosa Meat, Supermeat and BlueNalu

SHUNJI MURAKAMI | UMITO PARTNERS

CEO of UMITO PARTNERS, Over a decade of marine conservation and sustainable fisheries leadership in Japan. Former Japan Program Director at Wild Salmon Center and Ocean Outcomes (O2), and Executive Vice President at Seafood Legacy. Serves on Asia Pacific FIP Community of Practice Council and Japan's Aquaculture Industrialization Promotion Council.

SAGAR TANDON | BEYOND IMPACT

Involved in setting up 2 funds - Gray Matters Capital (family office managing over $200 million in AUM), edLABS & Australian Govt. DFAT(1) backed impact fund. Led investments in over 20 early-stage. Mentor at Good Food Institute India & APAC, FI Food APAC and Fashion for Good, Netherlands. Advisor at 2X Global Forum and 2X Ignite.

TARJA ZUDEMBERG | BEYOND IMPACT

20+ years of experience in venture capital, impact investing, and SME financing. An active angel investor, investing in early-stage Nordic startups focused on sustainable goals. Previously 13 years as CEO and Fund Manager at Almi Invest, executing over 100 transactions across 60+ portfolio companies and holding 30 board seats.

ADVISORS & VENTURE PARTNERS

D. MICHAEL ADAMS | ADVISOR & ICOM MEMBER

Michael founded Ocean Assets in 2016 after a 30-year career in investment banking and a lifelong passion for the ocean. At that time, there were few financial initiatives targeting the blue economy and ocean issues. He established Ocean Assets Institute to fill that gap and to drive private capital to impactful ocean-related projects worldwide.

TORSTEN THIELE | STRATEGIC ADVISOR

Torsten Thiele is an expert in ocean governance and sustainable blue finance, drawing on over 20 years of experience in project and infrastructure finance with leading financial institutions. He is the Founder of the Global Ocean Trust.

MIRABELLE ADAMS | VENTURE PARTNER, SOURCING

Mirabelle holds a BSc in International Business Management from HEG Geneva (2025). She was awarded the Student Engagement Prize, recognising her leadership of several initiatives during her years at HEG. She speaks English, French, German and Japanese. Led several projects for Ocean Assets and, recently, for the Caribbean Biodiversity Fund.

PETER YU | VENTURE PARTNER, TECH DD

Program Director of the APAC Society for Cellular Agriculture (APAC-SCA), leading regulatory coordination and strategic partnerships across the Asia-Pacific region. He also advises Beyond Impact VC on future food investments and previously held equity research roles at BNP Paribas Securities.

GELTOR

"We love building this company with Claire and the Beyond Impact team. Their industry expertise and the platform they've developed for entrepreneurs are unique force multipliers."

ALGAMA

"I consider having Beyond Impact among our shareholders as a great privilege. Indeed, Claire is mission-driven, professional, and very supportive. As a result, they are in a great position to get the most promising deals in the current context. They have been in the field for years and know it very well. Their excellent reputation will convince the best people."

SuperMeat

"Working with Claire and Beyond Impact has been a personal and professional pleasure. Their uncompromising professionalism and deep knowledge of the Alt protein space have been an asset throughout our research and business development providing us with invaluable insights and understandings of the industry and the path that lays ahead."

Appendix

2026

INVESTMENT PROCESS & BEYOND

Deal Sourcing

- Partners leverage their networks to source high potential companies in core areas of focus – advanced nutrition, ingredients, materials, pharmaceuticals, deep-tech
- Proprietary deal sourcing platform (using Beyond Animal) - provides curated deal flow. We take a targeted approach, seeking a balanced portfolio mix aligned to our thesis

Screening & Deep Dive

- Two Partners deeply evaluate each prospective deal, one serving as lead
- Direct Partner contact enables hands-on support and guidance
- Stage-based diligence process starts with initial fit analysis before full memo
- Investment memo covers all key business, market and valuation metrics
- The term sheet & agreements are thoroughly reviewed by at least 2 Partners

Due Diligence Risk Analysis

- Multi-checkpoint DD & Risk Assessment: Internal ICOM, CIO Check and AIFM Check
- Unanimous approval from six-member internal committee that reviews investment memo, business case, evaluates the worst case scenario, sizing of the position and portfolio construction.
- CIO reviews merits of each deal
- Our designated AIFM provides important final diligence layer

Portfolio Management

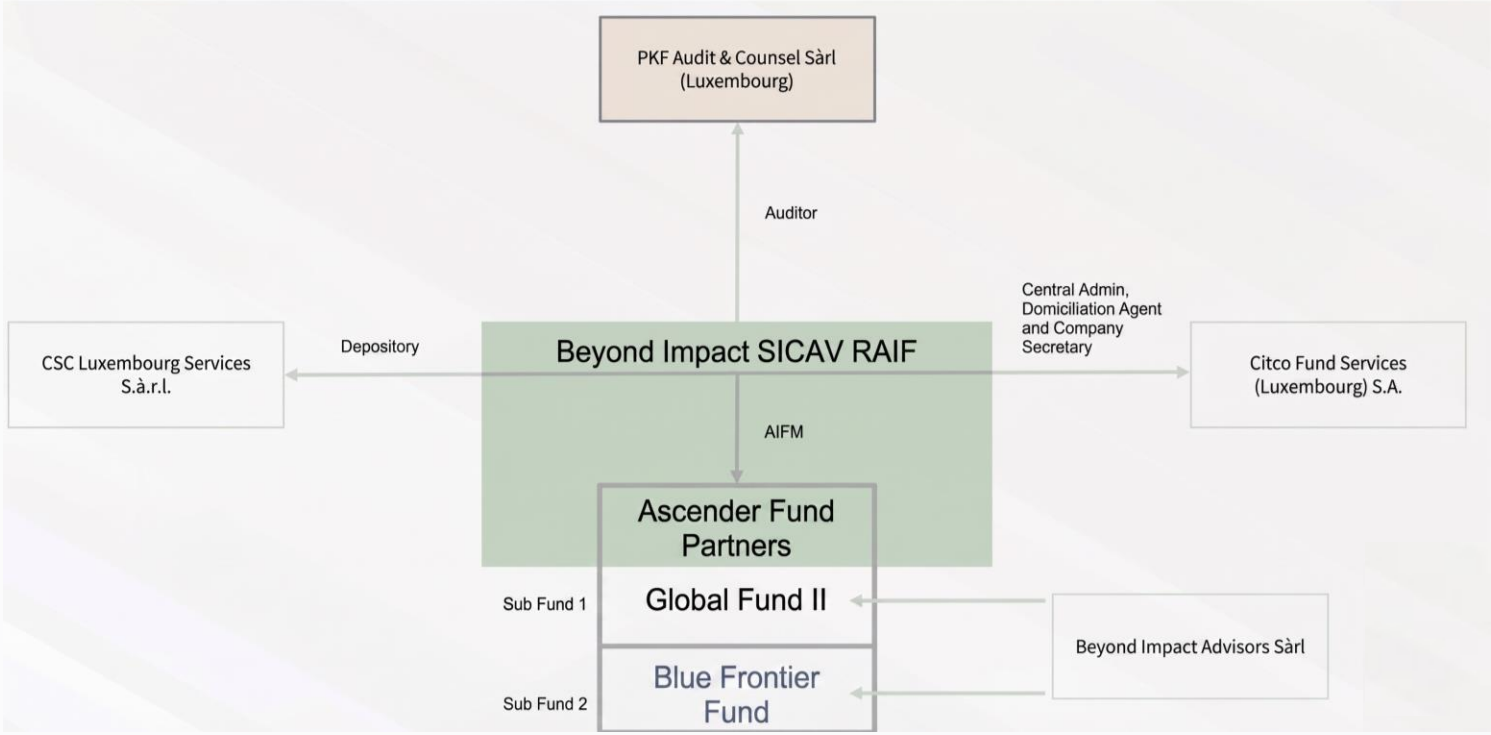

- One lead Partner actively monitors each portfolio company. Supported by a second Partner to lend broader expertise
- Lead Partners often take board or observer seats to guide strategy
- Analysing the ongoing risks and portfolio exposure evaluation for further consideration in terms of ongoing capital support

STRUCTURE & OPERATIONS

EXISTING FUND INFRASTRUCTURE ALLOWS BLUE FRONTIER FUND TO BE SET UP QUICKLY AND MANAGED COST EFFICIENTLY

- Luxembourg SICAV-RAIF as umbrella fund, MC Square SA as appointed AIFM
- Reputable partners in place for fund administration, depository and audit functions
- Beyond Impact Advisors Sàrl as registered investment advisor
- Creation of new sub-fund could be achieved in estimated 6 weeks

SELECT PORTFOLIO COMPANIES IN "NEW BLUE ECONOMY"

BLUE NALU | CELL AG BLUE FIN TUNA

Pioneer in cellular agriculture producing high-quality, sustainable seafood directly from fish cells
Raised: >$100 million

SWEDISH ALGAE FACTORY | DIATOMS (MICROALGAE)

Swedish Algae Factory cultivates microscopic diatoms to produce Algica, a high-performance silica material used in over 60 skincare products, wound care applications, etc.
Raised: >€12 million

UMAMI BIOWORKS | CELL AG AQUA NUTRIENTS

First company globally to create cultivated crustaceans, develops automated modular systems to efficiently scale cultivated seafood
Raised: >$10 million

INGREDIOME | CYANOBACTERIA FERMENTION

Production of functional and highly nutritional animal proteins using cyanobacterial-based precision fermentation
Raised: >$5 million

ALGAMA| MICROALGAE BASED INGREDIENTS

Creating innovative functional nutrients and ingredients containing extracts of micro-algae, with improved nutritional and gustative properties
Raised: >€20 million

GELTOR| SYNTHETIC BIOLOGY

Developing superior texture solutions, designed and built with synthetic biology for use in nutrition, personal care and pharmaceuticals
Raised: >US$ 100 million
